

CART SMART

10-Minute Grocery Sprint

Let's face it...

There are some chores you can speed through — like loading and unloading the dishwasher or folding the laundry.

Others, like caring for houseplants and reorganizing a closet, take a little more attention and thought.

And then there's GROCERY SHOPPING, which requires both SPEED and ATTENTION to get it done in a way that serves:

- ✓ ***Your goals***
- ✓ ***Your health***
- ✓ ***Your schedule***
- ✓ ***Your wallet***

In fact, grocery shopping is more than just a chore — **it's a basic LIFE SKILL a lot of us take for granted!**

That's because the foods you choose become the meals you eat to nourish and fuel your body.

I created this guide to help you simplify and streamline your grocery shopping so you can save time and money — AND make it easier to hit your goals.

Inside you'll find everything you need to streamline your shopping trips for major results!

Let's do this!

Michele

Grocery Shopping 101

SOME QUICK STATS:

- *People make an average of 8 trips a month to the grocery store¹*
- *The average person spends more than 2 hours each week shopping for groceries*
- *In 2022, people spent an average of \$5,703 on food eaten at home (and another \$3,639 on food eaten away from home)!²*
- *Saturday is the most popular day for grocery shopping, with almost 41 million people making the trek to the store*

That's a lot of time and money.

There's good news:

Time-efficient shopping can actually HELP you make great food choices.

You just need a strategy... and a plan!

YOUR 10-MINUTE

Cart Smart Strategy

- Do 1 “big” grocery trip a month for pantry items like oatmeal, almond butter, rice, beans, olive oil, etc. This trip may take a little longer than 10 minutes — but consider it an investment in time saved over the next few weeks!
- Once a week, use your “Cart Smart 10-Minute Sprint” guidelines to shop for perishables (produce, meat and fish, eggs, etc.).
- Keep a running list of things you need. As soon as you notice you’re running low on something, add it to the list.

HELPFUL TIP

Rely on tech (like your phone or Alexa device) to help you keep your grocery list up-to-date.

- Before you hit the store, spend 10 minutes creating your meal plan, complete with a list of any ingredients you need.
- Do a quick scan to see which perishables (dairy, produce, meats) need replenishing.
- *Go shopping!*

Later in this ebook, you’ll find TWO master shopping lists. One is for your monthly “big” grocery trip and the other is for your weekly “10-minute sprint.”

Your Pre-shop Prep

This is when a lot of the magic happens — having a clear plan is a key part of a successful grocery trip.

It takes just a few minutes of “grocery prep” time to ensure you’ll be making healthy, delicious meals, saving money, and spending LESS TIME in the store.

- #1** *Create a meal plan for the coming week, and add the necessary items to the grocery list you’ve already been keeping*
- #2** *Scan the fridge, pantry, and cabinets to see if you’re running low on any perishables*
- #3** *Organize your list according to your store’s layout*
- #4** *If you feel the least bit hungry right before you go shopping, eat a healthy snack so you aren’t tempted by junk food*²
- #5** *If possible, go to the store when it’s not busy (i.e., not on a Saturday afternoon)*
- #6** *Give yourself a time limit for shopping the inner aisles, like 5 minutes!*

CLEAN AND WHOLE-FOODS-BASED

Monthly Grocery List

- *Even though this trip will take longer than 10 minutes, stay focused on what's on your list to avoid temptation.*
- **Repeat this mantra: Necessary aisles only! This will save you time AND money.**
- *Customize this list based on your needs and household habits.*

GRAINS & LEGUMES

- Quinoa
- Brown rice
- Lentils
- Chickpeas
- Whole wheat or gluten-free pasta
- Rolled oats
- _____
- _____
- _____
